DIARY NOTES

DD/A

15 October 1954

STAT

1. [] telephoned to say that he was meeting with the Fairfax County Planning Board next week at which time the Commissioner of Highways in Virginia would be present. He is somewhat optimistic that we might get some assistance in developing the Langley site for a new building. I suggested that we go ahead and clear the decks with the Office of Defense Mobilization and the President in any case and agreed to follow through with the Director.

H

2. I talked with [] about the adjustment of the personnel ceiling in the Office of the Deputy Director (Plans). Told him that the Personnel Statistics Report for the period ending 30 September 1954 indicated that the "on duty" strength for that component was [] below authorized ceiling and that with a net intake in the whole Agency of from zero to fifty people per month it did not seem to me that there was any reasonable expectation of filling these vacancies very quickly; consequently, I stated that it did not seem proper to raise the personnel ceiling in this area. I asked him to provide me with further justification, which he agreed to do.

STAT

3. I told [] that the meeting that had been conducted to discuss quarters allowances seemed to me not to propose action rapidly enough. I stated that I had no disagreement with sending out a questionnaire but thought that an immediate statement should go out to all field offices telling them it was our policy that our people were to be comfortably equipped but must not stand out in relation to other U. S. Government employees and, particularly, []

STAT

4. At the Deputies' Meeting we discussed the public release of security figures by the Civil Service Commission. The Director took a very strong position and said that he felt he was justified in classifying our figures and that if the Civil Service Commission would not respect this stand he proposed to bring the matter to the President's attention. He felt strongly that the publication of such statistics concerning a secret intelligence service was extremely detrimental and jeopardized our relationships with foreign intelligence services.

H

5. Due to Hurricane Hazel employees were dismissed at 1:30 p.m.

6. Briefed [] case and told him I had understood that the SR Division wanted to keep her on Agency rolls in order to

allow her to gradually pay back the money she owed. I said I hoped that this did not represent the thinking of [] Administrative Officer of the SR Division. Ted said that he would have a talk with [] on this matter.

STAT

STAT

7. I talked with Ted about the possibility of retaining [] on a part-time basis sometime after the first of the year. He said that he certainly would hope we could do this and emphasized that [] was extremely useful to him in the handling of []

STAT

Mr. Amory:

Enised the problem of J. Edgar Hoover's disagreement with the warning and alert procedures of the National Indications Center and suggested that the Director might now wish to take this matter up with the Attorney General. The Director indicated he would do this and advise the Attorney General that he may wish to have J. Edgar Hoover present during this discussion.
